

Bag Envy

Envi Reusable Bags are the newest, most reusable bags on the market, and with designs that range from fashionable black and white prints to custom logos, chances are attendees are going to use them again and again. Envi is also one of the first to bring PET, an ultra-sustainable fabric made from recycled soda bottles, to the U.S. and Canada. PET's thick, luxe material looks good and lasts longer, so these bags will be ready for use well after your event is over. www.envireusablebags.com
