

Paper or Polypropylene?

Give your attendees a branded bag that's both stylish and Green with the Envi non-woven 100-percent recycled polypropylene bag from Envi Reusable Bags, a Division of Syfel Inc. The company uses a heavier thread in its recycled polypropylene bag, making it sturdier and more durable than many similar bags on the market.

The bags can be customized in a number of ways, such as adding insulation, zippers, and grommets. **Contact:**
